To: Bren-Tronics Valued Customers

Sub: Coronavirus – Factory Operational

Dear Valued Customer,

Bren-Tronics continues our support of, and is fully sympathetic to, those people directly impacted by the Coronavirus. Our sincere hope that those impacted get treatment and the effects of this very serious matter are minimized. We support all measures to reduce personnel exposure.

As the situation has continued to evolve and the Coronavirus impact has spread, our factory had been directly impacted and was temporarily shut down for two weeks.

On Monday, 20 April 2020, we will begin to restart operations, producing essential products in support of you, our OEM, DOD, and MOD customers.

We will operate utilizing the following protective measures to reduce staff exposure: spacing between staff, face masks, cleaning of work areas etc.

- We will be evaluating our planned deliveries and providing updates as we can. At the moment we are planning for a 30-day shift in pre shut down delivery dates but will continue to ship items when able, completing partial orders if need be, to have finished goods ship out in a timely manner.
- Our supply chain has held firm, with our inventory positions and committed supply lines, we do not foresee our supply chain impacting our ability to deliver now that we have restarted production.

We will continue to do all we can for you and look forward to meeting your current and future needs and thank you for your continued support and business opportunities.

Sincerely

Doug Petito
Sr. VP Sales & Marketing
Bren-Tronics, Inc.
