

## RoHS and WEEE Statement of Awareness, Bren-Tronics, Inc.

**WEEE /RoHS**– Bren-Tronics is aware of EU Waste Electrical and Electronic Equipment and Reduction of Hazardous Substances directives.

- At this time Bren-Tronics is excluded from this directive due to military use product applications requiring high reliability performance. Bren-Tronics Engineering continually searches for technological improvements of the material utilized to manufacture Bren-Tronic products.
- Bren-Tronics currently utilizes Sn/Pb solder for joining electrical connections. There is no decision to institute a “lead free” program at this time as a result of the “tin whisker” phenomenon and subsequent unreliable soldered connections that may result in equipment failure.
- At such time that information becomes available to support a reliable replacement material, Bren-Tronics will perform the necessary evaluations for potential incorporation within Bren-Tronics equipment.

Additional information about Bren-Tronics products may be found on Bren-Tronics’ website at [www.bren-tronics.com](http://www.bren-tronics.com). Questions regarding RoHS and WEEE compliance may be directed to [sales@bren-tronics.com](mailto:sales@bren-tronics.com)
